Timestamp,"Presentation was well organized","Speaker spoke clearly and was easy to understand.", "Presenter was enthusiastic about the topic.", "I learned something new today", "What was something new you learned from this presentation that you didn't know before?", "What worked well for the presentation/presenter?", "Suggestions for improvement. What are some changes would you advise the presenter to make their presentation more effective?",

"11/11/2019 14:40:13",4,3,2,5,"I learned about the history of the iphone. The first iphone pricing and how the display overtime. Learned about the modern upgrades the iphone has gone over time. Introduction to the new technology and smaller bezels. ", "She had a jam pack amount of data in her presentaion and was well paced. She had clear presentation that had a clear timeline and history. She included consistent data deliver with her presentation .

", "She can talk to the audience, instead of talking from the slides. She doesnt sound very interested in the topic. She talk clearer and not have a monotone voice. She can be more relaxed and sound less like a robot. ",

"11/11/2019 14:43:52",5,2,1,1,"I did not learn anything new today. Since a lot of people including myself follow the releases of the new iPhones each year, it was something I knew already. She could've went in depth about the tech behind the iPhones. ", "The presentation was well researched and seemed like she spent a lot of time on it. I liked how she included all what she was talking about on the slides. It allowed me to easily follow what she was talking about. ", "I think she spent too much time on the history of the iPhone. I did not really like the topic. She should have spent more time on the technology advancements of the iPhone and how their various technologies work behind the scenes. She could also say what made each iPhone revolutionary at the time. ",

"11/11/2019 15:15:15",3,2,1,2,"I sort of relearned a lot of technical facts about the older iphones but most of the information was facts I already knew because I used to research all the iphones a lot and compare them so this presentation had a lot of known information for me.", "Presenter included pictures of all the

iphones so you could see the gradual evolution from iphone to iphone. Also separated them into generational categories showed how much iphones have evolved over the years.", "Most of the facts about iphones are really technical and not relevant such as the dimensions and the camera quality over and over again. Technology naturally improves over time but focusing on the software features would've been more useful.",

"11/11/2019 14:42:19",4,5,3,1,"I didn't really learn anything. The presentation had a lot of information but a lot of it was useless. I would have liked to see more about the impact iPhones have had on the technology industry rather than just the specs of each iPhone.", "She did a lot of research on her topic. She talked loudly and clearly so everybody could hear what she was talking about. Her presentation was well organized and easy to look at. She had a lot of information on her topic.", "There is way too much text on the slides. Presenters should talk from knowledge rather than read from the slides. I would have liked to see more about the impact iPhones have had on the technology industry rather than just the specs of each iPhone.",

"11/11/2019 14:43:09",5,5,5,5,"I learned the history of iPhones. The first iPhone came out in 2007 and Siri was introduced in 2011 with the iPhone 4S. I also learned that apparently, Siri records and stores everything that we say to her for up to 2 years. iPhones were also very cheap in the first few years compared to now, it's almost 10 times its price.",

I like that her slides were very organized and were separated by the different generations of iPhones. She included and compared the some specs of each generation and explained what was improved with each generation. She also included a video clip to summarize the newer generations. I also liked that she included some fun facts about all iPhone in general, for example apple sold over 1 billion phones. ", "Her presentation was very informative about the history and spec of each generation and included a video at the end of the newer models. However, I would suggest to explain the newer models because it was hard to see the all of the information about them.",

"11/11/2019 14:43:28",4,4,3,4,"Iphone was released in 2007 ran on iOS1. Iphone 3G was sold for \$199-\$299. Iphone 5 was the first to use ultra-fast LTE. Siri data gets stored to apple. ", "She explained the difference between the different generations of the iPhone and had pictures of each. The video was a nice touch but needed volume or for her to explain more on what was happening. ", "She seemed to know a lot about iphones but was mostly reading from the screen. She also had a lot of bullets on the slides and was too wordy. ",

"11/11/2019 14:43:30",5,5,5,5,"In this presentation i learned the history of iphones. I learned different generations of iphones and how with each iteration the iphones were changed. By iphone 4 the phones became 25% thinner. Apple also started releasing different versions of the same generations. ", "The presenter had alot of information on their slides that were easy to follow and understand, the presenter also had a video of all the iphones and their progression with specifications to

the current generations of iphones.", "The presenter didn't do too much that needed improvement, maybe the presenter should have summarized the slides more rather than read everything from the slides, so it would have been easier to understand.",

"11/11/2019 14:44:06",5,5,5,3,"The release of the iphone 3Gs was the first iphone to receive an interim update, iphone 4 was the first iphone to change the physical design. Iphone SE was released because apple realized some people preferred smaller phones. ", "Very nostalgic presentation, as I found myself remembering my first iPhone and mentally noting the iPhones I have bought over the years. A lot of spec information on all the different models of iphone throughout the years.", "Didn't learn much new information, maybe gearing the presentation towards an iPhone demonstration on how I could learn to do something new with my current iPhone. Teach about different features and nuances that people may not realize their iphone could do. ",

"11/11/2019 14:44:33",3,3,3,2,"I learned a lot about the older generation of the iPhone. Like the different specs of the older phones from earlier models. This is very interesting to see iPhone's revolutions. I feel that iPhone wasn't change much since the earlier releases. I compare my phone with the early phones that was a big jump in specs but not a big jump in designs. ", "She did a lot of research on each phone models. I can see different display screen size for each model, rear camera resolution and various sizes of the iPhone, each battery capacity, different storage and different CPU models. Siri data is quite interesting topic too. ", "She should not just read from the slide, basically zero eye contact with the audience makes the presentation very boring. This is a big no, also she should make different comparison between iPhones when she pull up all the iPhone models. I believe it's a great showcase to compare different phones in term of spec, screen, storage or camera etc. ",

"11/11/2019 14:44:38",4,5,2,4,"I learned about the history of the Iphones and all the various different phones that were made. It was interesting to see all of the history of the Iphones bundled together. Very rarely do you get a complete picture of the timeline of all the Iphones. ", "I think the presentation was very informative and factual. There was a lot of history that was mentioned and we learned a lot. The presenter definitely did her research, which made the presentation more interesting.", "I think the presentation would be much better if she didn't read directly off the slides. It made the presentation a little boring, and if she walked around and used various tones, it would help a lot.",

"11/11/2019 14:46:15",5,5,5,5,"I knew all the things that she presents to us. The first generation of iPhone release when I was a freshman at a university. At that moment it was so expensive in China. Most of us use Nokia phones at that moment. My first touch screen smartphone is htc desire. till now I still remember all the generation of iPhones. ", "She is well organized for her topic. everything she said is step by step. and it is also easy for us to understand. It is not the best tire presentation but an average presentation. And the time management of her presentation is good. ", "Her topic is not attractive to me. I

think if she talks about programing it is much better. What she presented, we can easily find out in 5 mins. Other than that, I can not tell any more that she did not do so good for her presentation. ",

"11/11/2019 15:05:27",5,5,5,5,"For this presentation, I learn some of history of iPhone, the first iPhone was released from begin of the smart Phone was make in the apple company. The iPhone was increase people to use the iPhone in the future.", "For this presentation, presenter show a lot of information about the first iPhone to the iPhone 11 pro max, those iPhone was increase and change people life in the future. The iPhone have increase different color and update the new CPU to increase performance for iPhone.", "For this presentation, Presenter maybe provide a little more detail about the iPhone to iPhone 11 pro max, and should give more background image and video for the presentation. Presenter need get more information about the iPhone to increase people to use the iPhone.",

"11/11/2019 15:50:37",5,5,5,5,"The presentation was about the history of iphone. I learned that the first iphone came out in 2007 and that it was selling really good when it was released. Also, I learned that the Iphone SE came out even after the 6th gen.", "The presenter showed good combination of text and images in the power point. There were many detail about the history of each Iphone generation along with some statistic. Also the presenter showed a video which helped explain the topic.", "The presenter was reading the text and power point behind the speaker desk. I dont know if it is because of the topic. At first, learning about the history was interesting, but may be because of the amount of generation iphone has, it get boring after a few generations.",

"11/11/2019 15:56:55",5,5,4,4,"Iphone 5s allowed users to scan their fingerprint to unlock their phone. As the new version of iphone comes out, the display become larger. Siri save the data for 2 years. And the storage of iphone upgrade each generation. ", "She list all generation of iphone and made comparison. She talked about each generation of iphone' s storage, what color it has for each model and the launch date of each iphone. She spoke clearly and loudly. ", "She can add more background of apple and the founder of iphone. Instead of showing the configuration of the iphone, she also can talk about some news about iphone and how iphone change the phone marketing.",

"11/11/2019 18:53:12",4,3,3,2,"In this presentation, I didn't really learn anything too different from my own knowledge on the topic of Apple iPhones, but it was still very interesting to be refreshed on specific details pertaining to iPhones.", "The presenter had very good energy and speaking voice which helped make the presentation interesting and engaging for the audience. The presentaion was also very well organized and easy to follow and understand.", "The presentation could be made more effective if the presenter not only discussed iPhones but thoroughly analyzed Apple's products, especially in relation and comparison to their competitors. It would be a very interesting presentation to learn more about the various models and products of Apple and how they finalized on the products that we use today.",

"11/11/2019 18:53:53",5,5,3,4,"The presenter talked about iPhones and their generations. Talked about the specs and compared generations. The sales of the first generation quickly reached one million. Specs include battery, data, camera, screen resolution, RAM, processor, etc. ", "The presenter was able to communicate every iPhone generation's specifications, prices, and any available data on them. The slides contained a copious amount of information, covering everything that was spoken about and even more that time constraint wouldn't allow.", "The presenter was perhaps a bit monotone in their talking of the subject. There was minimal enthusiasm and the information seemed repetitive in a manner, since a lot of the information is the same just different numbers. ",

"11/12/2019 11:54:34",5,4,4,4,"I learned that the iPhone 4 was the first iPhone that was sold by other mobile carriers such as Verizon. I have also learned that Siri records everything you say to her to Apple Inc. for data analysis.", "Vivian managed to demonstrate the iPhones from each generation from the year 2007 to the present. She have also described the modifications that Apple has made throughout the generations, such as making the iPhones thinner.", "During the presentation when Vivian showed a YouTube video on the twelfth generation and above of the iPhones, she should attempt to describe each iPhone shown on the screen rather than remaining silent.",

"11/21/2019 11:42:50",5,5,4,4,"I probably learned about some iPhones specifications. Mostly I refreshed my memory about iPhones. Also fun fact was really interesting. I did not know too that Apple stores and analyzing my requests to Siri for two years.", "I would say that slides organization and the way she was reading those slides were very nice. Also the way slides were changing it was interesting. Fun facts were informative and it worked well too. ", "I would recommend to Vivian to present not only specification. Maybe something about how iPhone was designed, how this design had impact. How people were reacting on the new design every year. I like Apple products.",

"11/18/2019 13:56:03",4,4,3,3,"This was the first time I had a complete understanding of the product development of a technology company. Apple has tried many times to develop and sell the iPhone. In the design and development of mobile phones to continue to adapt and explore new directions.", "The presenter used a very detailed introduction from the initial development of the iPhone to the current product. This process analysis gives students enough information to think and analyze the development process of the product. This will help students understand the design and development ideas of the product, and give examples to students' project development.", "The presenter should be prepared for the presentation. Too much detail is not good for students to read. The presenter should mark every update and change in the development of the phone in the case. This will make the presentation more efficient and help students think about the development of the product.",

"11/21/2019 15:22:37",5,5,5,5,"I learned about the different types of iPhones that have been made by Apple over the years. I learned that the first-ever iPhone was released in 2007 and cost \$499. I learnt how much iPhone has changed since

the first release. ", "She had a good depth of knowledge of iphones. Her use of video to show how the device has evolved throughout the years was really good. The fun facts she used were nice. Her depth of knowledge and enthusiasm for iphones came across really well. ", "I think her whole presentation came across really well. She did a presentation on how the iphones have evolved throughout the years, it was really well put together. I would suggest her pick out things that really stand out and speak about them more. ",

Timestamp, "Presentation was well organized", "Speaker spoke clearly and was easy to understand.", "Presenter was enthusiastic about the topic.", "I learned something new today", "What was something new you learned from this presentation that you didn't know before?", "What worked well for the presentation/presenter?", "Suggestions for improvement. What are some changes would you advise the presenter to make their presentation more effective?", "Additional comments for the speaker"

"11/11/2019 14:40:13", 4, 3, 2, 5, "I learned about the history of the iphone. The first iphone pricing and how the display overtime. Learned about the modern upgrades the iphone has gone over time. I would have liked to see more about the impact iPhones have had on the technology industry rather than just the specs of each iPhone.", "She did a lot of research on her topic. She talked loudly and clearly so everybody could hear what she was talking about. Her presentation was well organized and easy to look at. She had a lot of information on her topic.", "There is way too much text on the slides. Presenters should talk

from knowledge rather than read from the slides. I would have liked to see more about the impact iPhones have had on the technology industry rather than just the specs of each iPhone.", "

"11/11/2019 14:43:09",5,5,5,5,"I learned the history of iPhones. The first iPhone came out in 2007 and Siri was introduced in 2011 with the iPhone 4S. I also learned that apparently, Siri records and stores everything that we say to her for up to 2 years. iPhones were also very cheap in the first few years compared to now, it's almost 10 times its price.", "

I like that her slides were very organized and were separated by the different generations of iPhones. She included and compared the some specs of each generation and explained what was improved with each generation. She also included a video clip to summarize the newer generations. I also liked that she included some fun facts about all iPhone in general, for example apple sold over 1 billion phones. ", "Her presentation was very informative about the history and spec of each generation and included a video at the end of the newer models. However, I would suggest to explain the newer models because it was hard to see the all of the information about them.", "

"11/11/2019 14:43:28",4,4,3,4,"Iphone was released in 2007 ran on iOS1. Iphone 3G was sold for \$199-\$299. Iphone 5 was the first to use ultra-fast LTE. Siri data gets stored to apple. ", "She explained the difference between the different generations of the iPhone and had pictures of each. The video was a nice touch but needed volume or for her to explain more on what was happening. ", "She seemed to know a lot about iphones but was mostly reading from the screen. She also had a lot of bullets on the slides and was too wordy. ", "

"11/11/2019 14:43:30",5,5,5,5,"In this presentation i learned the history of iphones. I learned different generations of iphones and how with each iteration the iphones were changed. By iphone 4 the phones became 25% thinner. Apple also started releasing different versions of the same generations. ", "The presenter had alot of information on their slides that were easy to follow and understand, the presenter also had a video of all the iphones and their progression with specifications to the current generations of iphones.", "The presenter didn't do too much that needed improvement, maybe the presenter should have summarized the slides more rather than read everything from the slides, so it would have been easier to understand.", "

"11/11/2019 14:44:06",5,5,5,3,"The release of the iphone 3Gs was the first iphone to receive an interim update, iphone 4 was the first iphone to change the physical design. Iphone SE was released because apple realized some people preferred smaller phones. ", "Very nostalgic presentation, as I found myself remembering my first iPhone and mentally noting the iPhones I have bought over the years. Alot of spec information on all the different models of iphone throughout the years.", "Didn't learn much new information, maybe gearing the presentation towards an iPhone demonstration on how I could learn to do something new with my current iPhone. Teach about different features and nuances that people

may not realize their iPhone could do. ", "Great presentation! Lots of Interesting information!"

"11/11/2019 14:44:33",3,3,3,2,"I learned a lot about the older generation of the iPhone. Like the different specs of the older phones from earlier models. This is very interesting to see iPhone's revolutions. I feel that iPhone wasn't change much since the earlier releases. I compare my phone with the early phones that was a big jump in specs but not a big jump in designs. ", "She did a lot of research on each phone models. I can see different display screen size for each model, rear camera resolution and various sizes of the iPhone, each battery capacity, different storage and different CPU models. Siri data is quite interesting topic too. ", "She should not just read from the slide, basically zero eye contact with the audience makes the presentation very boring. This is a big no, also she should make different comparison between iPhones when she pull up all the iPhone models. I believe it's a great showcase to compare different phones in term of spec, screen, storage or camera etc. ", "

"11/11/2019 14:44:38",4,5,2,4,"I learned about the history of the iPhones and all the various different phones that were made. It was interesting to see all of the history of the iPhones bundled together. Very rarely do you get a complete picture of the timeline of all the iPhones. ", "I think the presentation was very informative and factual. There was a lot of history that was mentioned and we learned a lot. The presenter definitely did her research, which made the presentation more interesting.", "I think the presentation would be much better if she didn't read directly off the slides. It made the presentation a little boring, and if she walked around and used various tones, it would help a lot.", "Great job!"

"11/11/2019 14:46:15",5,5,5,5,"I knew all the things that she presents to us. The first generation of iPhone release when I was a freshman at a university. At that moment it was so expensive in China. Most of us use Nokia phones at that moment. My first touch screen smartphone is htc desire. till now I still remember all the generation of iPhones. ", "She is well organized for her topic. everything she said is step by step. and it is also easy for us to understand. It is not the best tire presentation but an average presentation. And the time management of her presentation is good. ", "Her topic is not attractive to me. I think if she talks about programing it is much better. What she presented, we can easily find out in 5 mins. Other than that, I can not tell any more that she did not do so good for her presentation. ", "

"11/11/2019 15:05:27",5,5,5,5,"For this presentation, I learn some of history of iPhone, the first iPhone was released from begin of the smart Phone was make in the apple company. The iPhone was increase people to use the iPhone in the future.", "For this presentation, presenter show a lot of information about the first iPhone to the iPhone 11 pro max, those iPhone was increase and change people life in the future. The iPhone have increase different color and update the new CPU to increase performance for iPhone.", "For this presentation, Presenter maybe provide a little more detail about the iPhone to iPhone 11 pro

max, and should give more background image and video for the presentation. Presenter need get more information about the iPhone to increase people to use the iPhone.", "

"11/11/2019 15:50:37",5,5,5,5,"The presentation was about the history of iphone. I learned that the first iphone came out in 2007 and that it was selling really good when it was released. Also, I learned that the Iphone SE came out even after the 6th gen.", "The presenter showed good combination of text and images in the power point. There were many detail about the history of each Iphone generation along with some statistic. Also the presenter showed a video which helped explain the topic.", "The presenter was reading the text and power point behind the speaker desk. I dont know if it is because of the topic. At first, learning about the history was interesting, but may be because of the amount of generation iphone has, it get boring after a few generations.", "

"11/11/2019 15:56:55",5,5,4,4,"Iphone 5s allowed users to scan their fingerprint to unlock their phone. As the new version of iphone comes out, the display become larger. Siri save the data for 2 years. And the storage of iphone upgrade each generation. ", "She list all generation of iphone and made comparison. She talked about each generation of iphone' s storage, what color it has for each model and the launch date of each iphone. She spoke clearly and loudly. ", "She can add more background of apple and the founder of iphone. Instead of showing the configuration of the iphone, she also can talk about some news about iphone and how iphone change the phone marketing.", "

"11/11/2019 18:53:12",4,3,3,2,"In this presentation, I didn't really learn anything too different from my own knowledge on the topic of Apple iPhones, but it was still very interesting to be refreshed on specific details pertaining to iPhones.", "The presenter had very good energy and speaking voice which helped make the presentation interesting and engaging for the audience. The presentaion was also very well organized and easy to follow and understand.", "The presentation could be made more effective if the presenter not only discussed iPhones but thoroughly analyzed Apple's products, especially in relation and comparison to their competitors. It would be a very interesting presentation to learn more about the various models and products of Apple and how they finalized on the products that we use today.", "

"11/11/2019 18:53:53",5,5,3,4,"The presenter talked about iPhones and their generations. Talked about the specs and compared generations. The sales of the first generation quickly reached one million. Specs include battery, data, camera, screen resolution, RAM, processor, etc. ", "The presenter was able to communicate every iPhone generation's specifications, prices, and any available data on them. The slides contained a copious amount of information, covering everything that was spoken about and even more that time constraint wouldn't allow.", "The presenter was perhaps a bit monotone in their talking of the subject. There was minimal enthusiasm and the information seemed repetitive in a manner, since a lot of the information is the same just different numbers. ", "

"11/12/2019 11:54:34",5,4,4,4,"I learned that the iPhone 4 was the first iPhone that was sold by other mobile carriers such as Verizon. I have also learned that Siri records everything you say to her to Apple Inc. for data analysis.", "Vivian managed to demonstrate the iPhones from each generation from the year 2007 to the present. She have also described the modifications that Apple has made throughout the generations, such as making the iPhones thinner.", "During the presentation when Vivian showed a YouTube video on the twelfth generation and above of the iPhones, she should attempt to describe each iPhone shown on the screen rather than remaining silent.", ""

"11/21/2019 11:42:50",5,5,4,4,"I probably learned about some iPhones specifications. Mostly I refreshed my memory about iPhones. Also fun fact was really interesting. I did not know too that Apple stores and analyzing my requests to Siri for two years.", "I would say that slides organization and the way she was reading those slides were very nice. Also the way slides were changing it was interesting. Fun facts were informative and it worked well too. ", "I would recommend to Vivian to present not only specification. Maybe something about how iPhone was designed, how this design had impact. How people were reacting on the new design every year. I like Apple products.", ""

"11/18/2019 13:56:03",4,4,3,3,"This was the first time I had a complete understanding of the product development of a technology company. Apple has tried many times to develop and sell the iPhone. In the design and development of mobile phones to continue to adapt and explore new directions.", "The presenter used a very detailed introduction from the initial development of the iPhone to the current product. This process analysis gives students enough information to think and analyze the development process of the product. This will help students understand the design and development ideas of the product, and give examples to students' project development.", "The presenter should be prepared for the presentation. Too much detail is not good for students to read. The presenter should mark every update and change in the development of the phone in the case. This will make the presentation more efficient and help students think about the development of the product.", ""

"11/21/2019 15:22:37",5,5,5,5,"I learned about the different types of iPhones that have been made by Apple over the years. I learned that the first-ever iPhone was released in 2007 and cost \$499. I learnt how much iPhone has changed since the first release. ", "She had a good depth of knowledge of iPhones. Her use of video to show how the device has evolved throughout the years was really good. The fun facts she used were nice. Her depth of knowledge and enthusiasm for iPhones came across really well. ", "I think her whole presentation came across really well. She did a presentation on how the iPhones have evolved throughout the years, it was really well put together. I would suggest her pick out things that really stand out and speak about them more. ", ""

Timestamp, "Presentation was well organized", "Speaker spoke clearly and was easy to understand.", "Presenter was enthusiastic about the topic.", "I learned something new today", "What was something new you learned from this pre-

sentation that you didn't know before?","What worked well for the presentation/presenter?","Suggestions for improvement. What are some changes would you advise the presenter to make their presentation more effective?","Additional comments for the speaker"

"11/11/2019 14:40:13",4,3,2,5,"I learned about the history of the iphone. The first iphone pricing and how the display overtime. Learned about the modern upgrades the iphone has gone over time. Introduction to the new technology and smaller bezels. ","She had a jam pack amount of data in her presentaion and was well paced. She had clear presentation that had a clear timeline and history. She included consistent data deliver with her presentation .

","She can talk to the audience, instead of talking from the slides. She doesnt sound very interested in the topic. She talk clearer and not have a monotone voice. She can be more relaxed and sound less like a robot. ",""

"11/11/2019 14:43:52",5,2,1,1,"I did not learn anything new today. Since a lot of people including myself follow the releases of the new iPhones each year, it was something I knew already. She could've went in depth about the tech behind the iPhones. ","The presentation was well researched and seemed like she spent a lot of time on it. I liked how she included all what she was talking about on the slides. It allowed me to easily follow what she was talking about. ","I think she spent too much time on the history of the iPhone. I did not really like the topic. She should have spent more time on the technology advancements of the iPhone and how their various technologies work behind the scenes. She could also say what made each iPhone revolutionary at the time. ",""
